"Innovation Prize as Fundraising Signal. Evidence from Xprize competitions" with Thomas Hellmann, Eleine Hungenberg and Andrew Tauhert (2026), *forthcoming*.

TEACHING EXPERIENCE

Said Business School, University of Oxford 2026

Support class lecturer

Applied Financial Economics (Graduate)

Saïd Business School, University of Oxford 2025
Teaching Assistant
Financial strategy (Executive education)

Saïd Business School, University of Oxford 2024, 2026
Support class lecturer
Executive finance (MBA)

Saïd Business School, University of Oxford 2025
Support class lecturer
Financial accounting (MBA)

Stanford university in Oxford 2024
Tutor
Game Theory and Financial Economics (undergraduate)

Oriel College, University of Oxford 2023, 2024
Summer School Lecturer
Economics of Information (undergraduate)
Corporate Finance (undergraduate)

University of Wisconsin-Madison 2022
Teaching Assistant
World Hunger and Malnutrition (undergraduate)

RELEVANT WORK EXPERIENCE

Saïd Business School, University of Oxford 2026-2027
Research Fellow in Finance
Continued my research on the Economics of innovation.

Centre for Business Taxation, University of Oxford 2018-2020
Pre-Doc Fellow
Worked on the tax treatment of corporate losses in the UK with large-scale administrative data.
Worked on business rates and their effects on commercial property usage rate. Paper available [here](#).
Co-authored a study on the optimality of combining a patent box with an R&D tax credit policy.

Crédit Agricole S.A., Economic Research Division 2016
Summer Intern
Specified and estimated macro-level models of corporate investment for the Eurozone and six of its member states (VAR models) and built the underlying database.

OTHER RESEARCH EXPERIENCE

Ramana Nanda 2022-2023
Imperial College London
Research focus: Financial frictions in university deep-tech spinouts and clustering of entrepreneurship.
Methods: Created a researcher-level dataset integrating academic track record (publications, grants) and entrepreneurial activity (patents, spin-out fundraising).

Thomas Hellmann
University of Oxford
Research focus: Relationship between start-up expectations and fundraising outcomes.
Methods: Combined standard ML models with fine-tuned large language models to extract features from unstructured texts describing start-up strategies.

2022-2023

Andrew Stevens
University of Wisconsin-Madison
Research focus: Price elasticity of soft drinks in California.
Methods: DID and triple-difference regressions with large-scale Nielsen retail scanner data.

2021

Paul Frijters
London School of Economics
Research focus: Statistical framework for cost-benefit analysis of mental health policies in the UK.
Methods: CGE models with externalities like increased employment with higher mental health.

2017-2018

LANGUAGE AND TECHNICAL BACKGROUND

Programming	R, Stata, Python, LaTeX, Unix, Docker, Git, Query DSL, SQL
Data	Orbis, PATSTAT, Eurostat, OpenAlex, Dimensions.ai, NIH Reporter, Google Patents, Pitchbook, Nielsen Scanner Retail
	Accreditation from the British government to use confidential administrative data
Modeling	Comparative Statics, Game Theory, Supply Chain Networks, Production Functions
Statistics	Econometrics (parametric and non-parametric), Machine Learning (NLP in particular)
Language	French (native), English (fluent), German (intermediate), Spanish (notions)

AWARDED FUNDINGS

Graduate Fellowship, University of Wisconsin-Madison	2020
Graduate Scholarship, Said Business School	2022
Green-Templeton College-SBS DPhil Scholarship	2022

OTHER INTERESTS

Rowing	Captain-manager of the Green-Templeton Men’s Team (2023-2024), won blades in Torpids 2023, Eights 2024, City 2026.
Sailing	Former catamaran sailing instructor at <i>Jeunesse et Marine</i> .
Football/Soccer	Played for eight years at the highest amateur level (Division d’Honneur) in France.
